Art Unit 1502

-2-

Restriction to one of the following inventions is required under 35 U.S.C. § 121:

I. Claims 1-7, drawn to a process of treating an infection, classified in Class 424, subclass 450.

II. Claims 9-16, drawn to a method of making a composition comprising an antimicrobial agent, classified in Class 264, subclass 4.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions Group II and Group I are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (M.P.E.P. § 806.05(h)). In the instant case the product can be used in a materially different process such as the formulation of an emulsion suitable as a liquid drink.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be
